Signature _____ Printed Name: _____

<u>DNA SAMPLE METHODS & SHIPPING INFORMATION</u>	
BLOOD TUBES 2-3 cc whole blood in “purple top” EDTA tube (Be sure to rock tube back and forth after collection). Shipping tubes: Ship tubes in well padded box. In hot months include an ice pack and ship via minimum 2-3 day delivery. In cooler months, tubes can be shipped via regular / ground delivery without ice.	FROZEN TISSUE- The tissue can be taken from almost anywhere on the animal, but is usually an ear or tail sample. If the animal is deceased, any non decayed sample is acceptable. The sample must be no smaller than 1/4” and must be frozen soon after collection. SHIPPING FROZEN TISSUE: Ship over night on ice.
TISSUE/DNA EAR PUNCH systems such as Hauptner -Typifix & Allflex TSU (Go to our website or call the office to order supplies). These methods both have a preservation agent in the collection tube. <u>After collection the tissue can be stored for several years at room temperature.</u> SHIPPING DNA PUNCHES: Ship in a padded envelope or box via regular/ ground delivery. No ice or refrigeration required.	BLOOD CARDS- We are set up to use FTA Whatman blood cards. If you choose to submit another brand of blood card, we will do our very best to get a result for you, but we can not guarantee that we will be successful. We use the Whatman protocol and reagents and this method is not ideal for other blood card brands. If we are unable to get a result, you would need to resubmit the sample and pay to have the sample tested again. If you use Whatman cards and we do not get a result, you can resubmit at no additional charge. SHIPPING BLOOD CARDS: Blood cards can be shipped via regular/ ground delivery.

*** Place an "X" under the desired test column for each sample ***

Sample Information: (Please Print Clearly)		Porcine Stress \$22				* RUSH \$10 per test See note at bottom of page	<u>Please check a box below if you would like these results to be emailed to a breed association:</u>
