<i>DNA SAMPLE METHODS & SHIPPING INFORMATION</i>	
<p>BLOOD TUBES 2-3 cc whole blood in "purple top" EDTA tube. (Be sure to rock tube back and forth after collection). Shipping tubes: Ship tubes in well padded box. In hot months include an ice pack and ship via minimum 2-3 day delivery. In cooler months, tubes can be shipped via regular / ground delivery without ice.</p>	<p>FROZEN TISSUE- The tissue can be taken from almost anywhere on the animal, but is usually an ear or tail sample. If the animal is deceased, any non decayed sample is acceptable. The sample must be no smaller than 1/4" and must be frozen soon after collection. SHIPPING FROZEN TISSUE: Ship over night on ice.</p>
<p>TISSUE/DNA EAR PUNCH systems such as Hauptner -Typifix & Allflex TSU (Go to our website or call the office to order supplies). These methods both have a preservation agent in the collection tube. After collection the tissue can be stored for several years at room temperature. SHIPPING DNA PUNCHES: Ship in a padded envelope or box via regular/ ground delivery. No ice or refrigeration required.</p>	<p>BLOOD CARDS- We are set up to use FTA Whatman blood cards. If you choose to submit another brand of blood card, we can not guarantee a result. We use the Whatman protocol and reagents and this method is not ideal for other blood card brands. If we are unable to get a result, you would need to resubmit the sample and pay to have the sample tested again. If you use Whatman cards and we do not get a result, you can resubmit at no additional charge. SHIPPING BLOOD CARDS: Blood cards can be shipped via regular/ ground delivery. 1-2 day Rush testing is not available for blood cards.</p>

*** Place an "X" under the desired test column for each sample ***

Sample Information: (Please Print Clearly)		Porcine Stress \$22				* RUSH \$10 per test See note at bottom of page	Notes or Other ID#s (will not be printed on certificate)

* RUSH TESTING 24-48 hour RUSH option is available. (weekends are not included in the 24-48 hours). Cost is \$10 extra per test. 1-2 day Rush testing is not available for blood cards.

Check the "RUSH" box next to each sample that you would like to have rushed. If there is more than one test requested for that sample, indicate in the notes section if all tests should be rushed for that sample, or only some should be rushed.
